

CYBERSECURITY SERVICES

At CRI Advantage, we understand the complexity involved in safeguarding the Department of Energy against cyber threats.

Our wide-ranging cybersecurity services provide your organization with the tools and expertise needed to effectively protect your operations against current threats, while also preparing you to tackle future challenges confidently.

Monitor for threats 24x7 and stop attacks in their tracks with a managed cybersecurity detection and response solution.

Easily design and maintain an effective cybersecurity program with our an all-in-one cybersecurity platform.

Offers a designated point of contact to assess events and incidents. We work with your organization to develop a customized Incident Response Plan and to define your Incident Response Team.

Provides your organization with direct access to top-tier executive CISO cybersecurity leadership, ensuring that you receive expert guidance and support for all your cybersecurity advising needs.

Offers a proactive approach to cybersecurity, allowing your organization to detect and remediate vulnerabilities before they can be exploited by attackers. With a focus on maintaining compliance with industry standards and regulations, V-Scan provides peace of mind and confidence in your organization's security posture.

CRI ADVANTAGE IS YOUR COMPREHENSIVE SOLUTION FOR ALL THINGS CYBERSECURITY

Our cybersecurity services enable you to manage your cybersecurity program in a holistic and integrated manner, addressing all aspects of your organization's security posture.

OUR EXPERIENCE

For over three decades, CRI Advantage has been a trusted provider of cybersecurity expertise and tools, delivering protection against cyber threats to organizations of all sizes.

CRI has extensive experience implementing this type of work across a wide range of industries.

Our track record includes successful collaborations with local government agencies, national wholesalers, and other organizations to remediate their business operations following a cybersecurity breach.
